The Euroshrimp Community

<http://www.euroshrimp.net>

Why the community?

**Expanding number of producers of shrimp in land-based systems
Europe-wide**

**Led to decision to hold the Euroshrimp Symposium – Bremen
Germany April 2017**

Attendees from Britain to Bulgaria, Holland to Turkey

“Forum.... and also a place where we, the scientists could identify areas needing development, bottlenecks, challenges, that can be addressed in the future.”

Who we are

Euroshrimpers are enthusiastic Scientists and Networkers who are dedicated to support, improve and promote the European Shrimp Aquaculture throughout Europe.

What we are

A point of contact for the European Shrimp production and its stakeholders. We aim to connect European shrimp producers - supplying information, offering help and providing support by us and by our network members.

What we want

Whether you are producer, dealer, scientist, service provider, investor, student, expert or amateur, you are welcome to join our network by signing in for our periodic newsletter. By building and maintaining this network, we want to enable you to get in contact with each other, discuss topics or find support for your business amongst our stakeholders.

What we hope for

By creating this network and information exchange platform we hope to develop a self-sufficient, active community where we help each other with knowledge and information to promote you, your interests or your business.
